Jersey City, NJ | (716) 486-5827 | [E-mail](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Finance Professional with 4 years of experience across FP&A, automated financial modeling, cash flow forecasting, and complex variance analysis. Proven track record of achieving 95% forecasting accuracy for multimillion-dollar operations and managing cost reallocations (\$460,000). Expert in building predictive models and dashboards using Excel, SQL, Tableau, and Python.

PROFESSIONAL EXPERIENCE

WebServes

New York, NY (Remote)

Finance & Business Development Coordinator

March 2025–Present

- Acted as a strategic business partner to development leadership by leveraging industry research across 350 nonprofits to identify donor KPIs, expanding the donor database by 30%, and informing a \$5,000 resource reallocation.
- Identified and corrected grant-related budget discrepancies by 25% by automating cash flow forecasting templates for grant expense tracking, which strengthened compliance and improved accuracy in monthly financial reports by 15%.
- Spearheaded a tri-state crowdsourcing campaign by developing a funding model that raised \$275K from 130 donors in Q2 and Q3-2025, boosting the regional donor base by 40% and expanding annual revenue by 18% YoY.

Gupta Garden

Nashik, IN

Analyst, Operations FP&A

June 2021–June 2023

- Achieved 95% cash flow forecasting accuracy by building Excel-based financial models to monitor liquidity positions, optimizing working capital by reducing vendor payment cycle times by 20% for a 160-client portfolio.
- Reallocated \$460,000 in idle departmental funds by executing SQL-based variance analysis of seasonal cash outflows and Power BI dashboards to identify budget deviations, improving liquidity utilization by 18% and budget variances by 22%.
- Developed a multidimensional model to evaluate capital deployment for a \$22M multi-city expansion; projecting 10-year cash flows and performing NPV/IRR analyses to ensure investment alignment with corporate hurdle rates (17.59% IRR).

Infinite Build & Coats

Nashik, IN

Accounting Associate

May 2020–May 2021

- Streamlined liquidity management by implementing 10+ VBA macros to automate A/P and A/R workflows in SAP B1; reduced month-end close by 3 hours, enabling real-time visibility into daily cash positions and bank reconciliations.
- Eliminated \$15,000 in operational inconsistencies and boosted expense tracking visibility by 20% by collaborating with internal stakeholders to implement ISO-aligned quality control systems, enhancing financial service delivery accuracy.
- Optimized the cash conversion cycle across 160+ construction contracts by automating Work-in-Progress analysis and billing workflows; accelerating the collections cycle by 10 days, successfully recapturing \$5,000 in annual working capital.

SKILLS

- Technical Skills:** MS Excel (VBA, PivotTables, Power Query), Python (NumPy, Pandas, Matplotlib), SQL, MATLAB, R, C++
- Financial Skills:** Financial Reporting, P&L Management, Revenue Projection, Trend Analysis, Financial Analysis, G.A.A.P.
- Analytics, BI, and ERP Skills:** Tableau, Power BI, SAP Business One, NetSuite, Data Mining, Data Modeling, Oracle DB

LEADERSHIP & PROJECTS

CVS Health Corporation Valuation Model | *Financial Modeling, MS Excel*

December 2025–January 2026

- Determined a \$68.96–\$156.73/share valuation range with a multidimensional model utilizing a calculated 6.72% WACC.
- Forecasted a \$466B+ revenue target and 4.59% CAGR by 2030 through automated working capital and CapEx schedules.

NYC Taxi Ride Data Analytics | *Python, SQL, Power BI & Streamlit Dashboard*

November 2024–January 2025

- Built an interactive Power BI dashboard from 100M+ NYC taxi records, identifying 15+ fare trend clusters.
- Engineered 5 LLMs in a Snowflake schema to predict and visualize taxi rides for CY'2025 with a Streamlit dashboard.

Fixed Income Capstone Research Project | *FX Risk Hedging, LSEG Yield Book*

October 2024–December 2024

- Conducted risk hedging and sensitivity analysis for a \$2.57B global bond portfolio using LSEG Yield Book.
- Modeled 500+ interest rate derivative swaps, projecting a \$3.17M MTM swing under various SOFR stress-test scenarios.

Portfolio Management Case Competition | *Risk & Return, Portfolio Analytics*

September 2024–December 2024

- Conducted Monte Carlo simulations (100,000 paths), yielding an expected portfolio value of \$1.6M and finishing 2nd overall.
- Performed Euler-based risk decomposition across 11 sectors to calculate risk measures (99% VaR: -\$18,497.13).

EDUCATION

SUNY University at Buffalo | *Master of Science, Financial Mathematics*

- Coursework:** Quantitative Analytics, Database Management, Machine Learning for Finance, Data Visualization

Pune University, ACBCS | *Bachelor of Business Administration, Major in Financial Management*

- Coursework:** Financial Accounting, Statistics, Financial Statement Analysis, Business Valuation, Corporate Finance
